

Yunca Monte – How to Install Fan

Step 1: For the EURO model only, remove the lower rear panel by undoing the four screws and detach the rectangular punch out from the panel. [Blue arrows]

For LEGS or PEDESTAL model, continue to step 2.

Step 2: Remove the lower fan bracket by undoing the two hex bolts. [Green arrows]

Step 3: Using 3x M6 bolts (minimum 12mm long) with washers (or using washer head bolts), secure the fan to the removed lower fan bracket. [Red Arrows]

Step 4: Reinstall the lower fan bracket (with fan attached) from Step 2. [Green arrows]
For the EURO model only, reinstall the lower panel removed from Step 1. [Blue arrows]
