

Safety

Please read this entire manual before installation and use of this wood burning insert. Failure to follow these instructions could result in property damage, bodily injury or even death.

We strongly recommend that smoke detectors be installed. If smoke detectors have been previously installed, you may notice that they are operating more frequently. This may be due to curing of stove paint or fumes caused by accidentally leaving the fire door open. Do not disconnect the detectors. If necessary, relocate them to reduce their sensitivity.

SAFETY NOTICE: If this stove is not properly installed, a house fire may result. For your safety, follow the installation directions. Consult local building or fire officials about restrictions and installation inspection requirements in your area.

Clearances

Masonry or Factory Built Fireplace

The minimum required clearances to surrounding combustible materials when installed into a masonry or factory built fireplace are listed below and in figure #1.

Minimum Clearances to Combustibles (Measured From Insert Door and Decorative Top)

Adjacent Sidewall	300mm.
Mantel.....	600mm.
Top Facing	600mm.
Side Facing.....	300mm.

CAUTION: Unit hot while in operation. Parts of the appliance, especially the external surfaces, will be hot to touch when in operation. Keep children, clothing and furniture away. Contact may cause skins burns.
