

CHARNWOOD

AIRE 3

&

HEATER POD

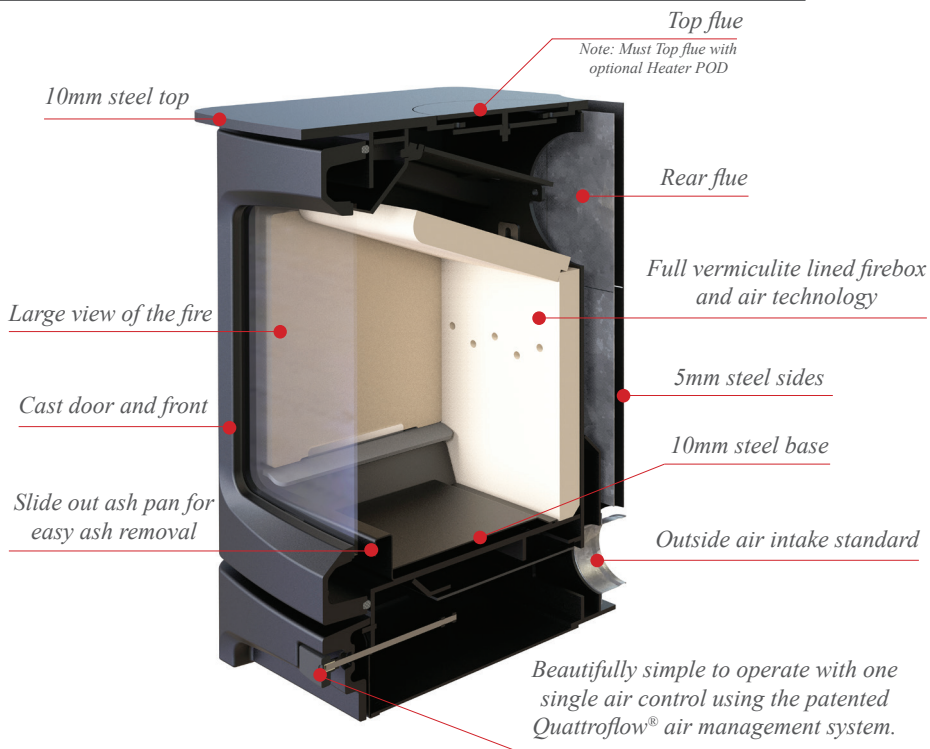

charnwood AIRE 3

A mesmerising flame pattern with a crystal clear burn

Perfect for small spaces, the Charnwood Aire 3 can heat up to 70+m2 (average heat output 35m2) and offers all the benefits of clean glass, clean burning, and a fully vermiculite firebrick lined firebox.

The best thing about the Charnwood Aire 3 is you can flue out the top or rear, making it perfect for smaller homes, YURTS and glamping shacks.

Pair it with The Charnwood Heater POD and you have a complete fireplace solution that is specifically designed for small space living. Safe, simple and quick to install.

OPTIONAL

charnwood HEATER POD

An instant freestanding stove chamber & hearth plate that is quick and easy to install

The optional Charnwood Heater Pod is designed for cabins, yurts, tents, boats, home offices and other tiny home accommodation. This neat steel enclosure creates a safe, protected focal point for the room.

The Charnwood Heater Pod can be placed on any hard, flat surface without the need for an additional hearth. It is available in a matt black powder coat with the option to add a VLAZE vitreous enamel liner for a stylish, easy to clean finish.

- Two Options: Black or with VLAZE splatter insert
- Integrated shelf can take a static hold up to 56kg
- The Stove Pod can be safely placed 50mm from the back to combustible materials.
